PRESS RELEASE

Reftek is pleased to announce we have been selected as one of the vendors to receive an “as and when” operational support contract for Strong Motion and Structural Health Monitoring of the Port Mann bridge in Surrey, BC from the B.C Ministry of Transportation and Infrastructure. The Port Mann was outfitted with Reftek seismic monitoring equipment in 2014. Reftek is uniquely qualified to maintain this equipment for the Ministry and we are proud to work with local partners to maintain this network.

Founded in 1975, Reftek has a long history of providing seismic monitoring solutions to customers the world over. In May 2020 Reftek was purchased by Canadian investors and moved to Nova Scotia Canada, keeping many of the former engineering and sales staff. Reftek has offices in Halifax NS and Dallas, Texas.
